buls and Painesville only.

Night Express East, and West, stops at Painaville, Ashtabula, Connegut and Girard only.

Over the Way.

At my accustomed place,
I missed, at yonder window,
A sweet, familiar face—
Missed a pair of white hands, sewing

Many times I looked out wandering

At the window there—
Why the heavy, drooping curtains,
Shut out light and air,
Why a darkened, mystic quiet,

Was it thus, the pleasant vision,

By that shaded casement, sewing

Days and weeks went by, and ever

Looked I forth in vain;
'Till one morning, when the sunshine
Sparkled through the rain,
Yonder at the window; looked out

That I loved to see—
That I saw and greeted daily,
Ne'er again should be,

One morning of the rosy June,

Dainty bits of lace !

Brooded over there.

Ever constantly?

That sweet fuce again.

By and by, the sash was lifted,

But the stranger there Held no work of snowy muslin,

In her rocking chair, But a pile of restless flannel, Very soft and fair!

Ne'er I've seen that precious bundle,

Since that bright June day,

A claimusat for that dainty sewing, Was-a baby o'er the way!

DE EMERSON MENSORY.

But the spring Connesut and Grand only.

Connesut Accommodations East and West, will stop at all object this renson, therefore, the moment it was living or dead, the savages were by no ascertained that he was one of the party.

A. C. Burnalib, Station Agent. 419 whole yelling crew set after him.

Captain Brady had something of the start, border; that he could distance and escape whole body in chase of himself, his very riated Indians in hot pursuit, arged on by ly consideration upon taking him alive or one all gradually disappeared.

But the captain was a brave man, and a a lack of effort.

Near the point where the race first started, the Coyahoga makes a bend to the South. so as to nearly enclose an area of several square miles in the form of a peninsula; the direction taken by Brady soon brought him within this enclosure; and the Indians, by extending their line to two banks of the stream, at the point where they most nearly approach each other, considered him as in a net I and announced their satisfaction by yells of triumph. There was now, in fact no chance for him to escape except through and considering that the foremost pursuers Mills, Portage Co., O.]
were not fifty yards behind him, either of Eds. Warren Chronide. these chances was regarded by the savages as an impossibility.

Still the hardy and gallant captain did not despair; he had many a time hunted over this very ground, and knew every inch of it, and all the windings, turnings, and peculiarities of the river as well as the Indiana themselves; he knew, too, there was one point where the river, compressed within a few feet; rushed rearing and foaning through a rocky gorge; and it at once occurred to him to shape his course for this point, and make a build, desperate leap for the other shore. He might fall short, and be dashed to pieces upon the rocks beneath, it was true; but this would only be a quick it was true; but this would only be a quick it was true; but this would only be a quick in the atake a waited him if taken alive; and to take him alive was unquestiously the being paid out at a rate which, in proportion to the distance run, would, if continished is memorable in the interory of the may being paid out at a rate which, in proportion to the distance run, would, if continished as the naval battle ground between its landed is memorable in the interory of the really statement. quite a large body of warriers, from the vicinity of the Cayahoga Falls, came suddealy down upon the suprotected frontier, and, before any check could be put to their dering quite a number of the whites, and effecting their retreat in safety.

At this time there was a well-known Indian hunter in that vicinity, one Coptain Samuel Brady, whose many daring exploits and hair-breadth escapes had rendered him as famous throughout that region as his contemporary, the celebrated Daniel Boon,

it was supposed to the Fulls, where it was save or destroy him, his heart beat wildly, known there was a vilinge, and his whole frame seemed to tromble with the intense concentration of his mind upon blood from long less of aleap, and he was

which would weaken it materially, and render their further pursuit still more hazardgradually yawning before him, and the benated long before the Niagara reached albumen; that the allumen is converted into Should they follow either one of the all the power of his concentrated will, he mile distant, through the wilderness, not a trails, he said, the other half of the Indians leaped into the air, like a bounding ball, person being visible on the beach. At the would escape; should they follow neither and landed safely upon the other rocky telegraph house he found the operators one, all would escape, and should they diverge of the abyse, striking a little below from London fast calcep, not one of them

teeming with adventure, and to this day the rasp-berry, bake-apple berry, and the pond in which the captain secreted himself beers his name; while the rocky chasm erous little lakes may be seen in the open, of the Cuyahoga, across which he made clevated ground, from which flow rivulots his desperate spring, is known far and near affording abundance of fine trout. After by the name of "Bnan's Leap." ascending for about a mile and a half, you are then probably 300 or 400 feet above the tide, and nothing can exceed the beau brated leap across the Cuyahoga, is about ty of the scone when, at one view you behold the placid waters of both Trinity and Placentia Bays-the latter sprinkled with clusters of verdant islands.

You can now descend westward as gradually as you came up from the Telegraph landing, to the shore of Placentia Bay, where there is an excellent harbor and admirable fisheries, skirting the shore, and the accompanying road running along the

The Scalpel for April contains a very in-That the food we cat is first converted into albumen; that the allumen is conveyed by a vein, into which it is directly deposited, to the right side of the heart; that it is thence transferred at once to the fungs, where it is converted by the air we breathed into blood; that if this air be insufficient in countity or indifferent in quality, the alluments are closely confident and the same. But all that common many of the same. But all that common many of the same is nothing—till by comparison and the same in countity or indifferent in quality, the alluments of the same in constitution of the same. inexpensively! This may seem odd; but these together, and then may whether it is true, nevertheless. We take as much Earth is not a microscopic atom, in

## Getting Pixed.

It is the fate-let us rather say the good fortune -- of men, to be giways fixing and the delivery of a sermon last Sonday in St them for ten minutes each way.

The signals showed that on the first day the speed of the Agamemnon slightly exceeded that of the Niagara, but on the succeeding days they went at the same pace, there never being any more than 20 islable. But the Decliphs thoughts themself is solid immovable, imperpace, there never being any more than 20 islable. But the Decliphs thoughts the results and the delivery of a surmon last Sunday in the delivery of Knowing that if his men continued together, there would be no hope for any of them, Captain Brady, in order to save as many lives as possible, called out to them to disperse in every direction, and each man to look out for himself. By this means he look out for himself, and finding his wound very painful, and look out for himself. By this means he look out for himself, and finding his wound very painful, and look out for himself. By this means he look out for himself. By this means he look out for himself, and finding his wound very painful, and look out for himself. By this means he look out for himself, and the proof fellow who is so unfortunation that the himself is solid immovable, impersion to the all absorbing topic of continued to the himself is solid immovable, impersion to the all absorbing topic of continued to the head at both ends, Mr. Field applied his tongue to the out of the hard at the biasele. But the Dedibeks, though a very miserity people. The fact of this would at the circuit in order to make a considerable was landed at both ends, Mr. Field applied his tongue to the and a look to the hard a very miserity people. The status is a look of the himself is solid immovable, impersion to the all absorbing topic of the same of the him expected to divide the Indians into small ed, and finding his wound very painful, and threw him over. The reason why messages no resort but to sell and buy again. The complish in the commercial, parties in their pursuit of single individuals; the cords of his leg fast stiffening, he cast adout him for some place to secrete himself fact that all the apparatus at both ends they not, unfortunately for his own safety, they not, unfortunately for his own safety, discovered in him their most vindicative and the apparatus at both ends feet everything around him at once. A thus successfully united by means of the was new and untried, and required a great deal of care and skill to adjust.

After running a short distance he discovered with the growning life of the owner. New and fresh ideas of the owner attention interpretation between parties in their pursuit of single individuals; the cords of his leg fast stiffening, he cast were not transmitted earlier was from the most foolish thing a man can do is to per- social condition of After running a short distance he dis- deal of care and skill to adjust.

Such is not the case with women. They matters affecting the success of the cable. in it, springing up in every woman's mind.
We saw a stove moving out of our own hense the other day, and overheard the conclusion of an arrangement with the men and shake some carpets. It had got to be done. We saw that, in the calm, determined eye of the lady of the house. We taken down and done up; there have got to be complaints for two weeks of lame backs procured by nailing down carpets; everything must be turned over and turned wrong side out, and, at last, all will come right again. The mistress will be satisfied, the girls will be sick, the house will be as clean and wholesome as a cedar, closet, and the lady will survey the premises with the pride which good housekeepers who love their lords so much delight to indulge in Next year the thing is to be repeated, with the same results. Nothing will stay Besides developing our homes, from year

to year, and keeping them clean; we are Jefferson the following and obliged to keep them in repair. That which related by Mr. Jefferson: vitality bailds only loses the vitalizing principle to become the prey of chemistry. The fence has rotted and needs repairing. The wood, in a score of instances, must take the place of that which is decayed. Violence has done its work also. The teamster employed in lashing the flies from their leg drove against the fence very carelessly, and So very vexatious was this annoyance, a hetter, provided the bill be not exhorbitant; birth to an empire republic and this everlasting fixing, is the great The anacdote I had from Mr. Jefferson and this everlasting fixing, is the great The ansedute I had from Mr. Jefferson, comfort of life. The man who is really at Monticollo, who seemed to enjoy it very fixed—who has nothing left to be fixed—
has nothing to do but die. Life has no
more of pleasure for blm. There is nothing glee, and seemed to retain a vivid recoil. left to be obtained, so we say to everybody tion of the severity of an attack, from whi who has the slightest temptation to get the only relief was signing the paper and everything right at once, and thus to have flying from the scene. it done with, to do no such thing. Cherish your wasts. Husband them, for there is more comfort in them than in your choicest which blesses you most.

NOVEL LODGINGS IN NEW YORK .- A NEW York correspondent of the New Haven Nesoz anya : A novel mode of securing today

practiced by a considerable number of pernight, and in consequence are locked out of doors at home, or, more likely, who have become insbriated, and do not wans to dis-close the fact to their friends or families.—

in quantity or indifferent in quality, the albumen, instead of turning into blood, forms tubercles, and these tubercles are the physical elements of consumption. That is, in multitude? No may living; and it is promultitude? No man living; and it is profew and plain words, the whole of the new bable that no man will ever live who can, theory. Of course the remedy is a simple bable that no man will star live who can one—viz: plenty of good fresh air. Nothone—viz: plenty of good fresh air. Nothing could be cheaper—nothing any more satisfactory. But will it do? We incline More than twenty thousand stars are airceady registered in our catalogues. William Herschell while comercing certain porkept right on through the night. Capt. Otter, who is a skillful pilot, is also a very prudent man. Anticipating that the Niage ara might arrive in the night, he caused boats to be stationed up the bay, along the course laid out for her, and at a signal the men in them kindled blazing torches, and people along the shore lighted huge boat fires to guide the mariners on their way.

The reason why signals and out to the mariners on their way.

The reason why signals and out to the mariners on their way.

The reason why signals and out to the mariners on their way.

The reason why signals and out to the mariners on their way.

The reason why signals and out to the mariners of the mariners of the Milky Way, naw more than the means of the Milky Way, naw more than of medicine, effectually cured themselves by the most reckless exposure to every species of weather. Fresiv air, we have reason to know, is one of the best medicaments in the whole catalogue of human removators. It has but one fault—it's to encounted. Nobody likes to get well so inexpensively! This next seem of the milky Way, naw more than there are no fifty thousand stars pass over the field of his tolescope, during a single hoor. In a strip of sky only two degrees in breadth. Lapton to know, is one of the best medicaments in the whole catalogue of human removes the best medicaments in the whole catalogue of human removes the most reckless exposure to every species of weather. Fresiv air, we have reason to know, is one of the best medicaments that there may again the men in them kindled blazing torches, and people along the shore highly thousand stars pass over the field of his tolescope, during a single hoor.
